■ Bolt-On Clevis	No	No	Yes
■ Lower Spinner Beater Option	No	No	Yes
■ ASAE Capacity Rating (Heaped Cubic Foot)	320	380	500

The new models have been designed with heavy use in mind. For faster spreading capability, many dairy customers use box spreaders for heavy pen-pack or maternity pen bedding. Most beef customers have heavier and drier material that doesn't work as well in side-discharge spreaders, so they need a heavily-built spreader that can take the abuse in the dense, dirt-like beef manure. These spreaders are built with these issues in mind for both beef and dairy operations.

AVAILABILITY

1150 Box Spreaders are available immediately and 1130 / 1140 units will be ready for shipment in mid-November.
