KUHN GMD 15030 Rear Mounted Quad Disc Mower

Kuhn North America, Inc., is pleased to introduce the new KUHN GMD 15030 rear mounted quad disc mower, the largest mounted disc mower on the market! This quad mower brings unmatched mowing capacity to the field, delivering a bold blend of sheer width and surprising agility. Its expansive 47'7" working width boosts productivity by up to 50% over traditional triple mower combinations, making it ideal for large-scale forage operations looking to maximize efficiency during peak harvest windows. Despite its width, the GMD 15030 is engineered for exceptional maneuverability, performing smoothly across varied terrain thanks to its synchronized cutterbars and independent articulation systems. When paired with a front mower, it can cut up to 49 acres per hour at typical operating speeds. It then transforms for transport, folding to under 10' wide and under 12.5' tall, making travel safe and efficient.

The GMD 15030 is equipped with four heavy-duty Optidisc® Elite cutterbars, engineered to produce a clean, precise cut in all crop types. Zero oil-change intervals and Protectadrive® safety stations help reduce maintenance requirements, minimize downtime, and keep operators productive when it matters most.

For superior ground adaptation, Lift-Control® hydropneumatic suspension allows each cutterbar to float independently and maintain consistent ground pressure. This results in improved forage quality, fewer impurities in the harvested crop, and reduced wear on skids and cutting components.

Operators can tailor the GMD 15030 to their preferences with a choice of control systems. The intuitive KFA 12 control offers straightforward operation, while full ISOBUS compatibility enables advanced automation for headland management, section control and machine diagnostics, helping ensure consistent, confident performance across operators of varying experience levels.

Designed to deliver productivity, durability, and ease of use, the GMD 15030 represents a significant advancement in high-capacity mowing technology for professional forage producers. These disc mowers are now available through authorized KUHN dealers across North America. To locate a dealer or learn more about the GMD 15030, visit www.kuhn.com.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
