KUHN GMD 30 + & FC 30 + Series Mowers and Mower Conditioners

Kuhn North America, Inc., is thrilled to introduce the new GMD 30 + and FC 30 + Series mowers and mower conditioners. The KUHN GMD triple mowers and FC triple mower conditioners deliver proven, high-capacity triple mowing performance with the added advantage of ISOBUS control.

When paired with a front-mounted mower or mower conditioner, the + Series boasts up to 32'6" (9.9 m) of working width in a single pass. Operators have the option of simple operation using the KFA 12 control box, or the addition of full ISOBUS automation for headlands, section control and diagnostics. For those who want modern control without long-term complexity, the new option of ISOBUS control is a game changer.

Built with the durability and performance KUHN is known for, these + Series machines feature the renowned Fast-Fit® knives and the Optidisc® Elite lubed-for-life cutterbar to reduce maintenance. Continuous Protectadrive® disc bearing stations reduce the risk of cutterbar damage from an obstacle strike, ensuring maximum uptime when it matters most. To respond to in-field obstacles, the non-stop hydraulic breakaway system allows the machine to move up and out of the way. They're ready to get the perfect cut no matter the field variability.

Lift-Control® hydropneumatics suspension allows the cutterbars to float independently while maintaining consistent ground pressure to react quickly to changing terrain, reducing ash incorporating and maintaining forage quality. FC 30 + mower conditioners offer the choice between the DigiDry finger conditioner or the Diamond Block rubber roller conditioner to match conditioning intensity to crop type, volume and drydown requirements.

Travis Wolf, KUHN Hay & Forage Product Manager Shared, "We've had farmers asking for ISOBUS on KUHN triple mower and mower conditioners, and I'm excited we have this solution available to forage growers. The addition of optional ISOBUS controls enables operators to integrate greater automation into their harvesting operations for improved efficiency and ease of use."

These mowers and mower conditioners are now available through authorized KUHN dealers across North America. To locate a dealer or learn more about the GMD 30 + and FC 30 + Series, visit www.kuhn.com.

Kuhn North America, Inc., située à Brodhead, au Wisconsin, est un chef de file en matière d'innovation dans le domaine des équipements agricoles et industriels.
