KUHN Introduces the GMD 9530 RV Rear Mounted Mower with Auger Merger

KUHN North America, Inc., is pleased to introduce the new GMD 9530 RV rear mounted mower with auger merger, designed to deliver high-capacity mowing and forage grouping in a single machine. Built for large dairies, feedlots and custom operators, the GMD 9530 RV provides a simple and efficient solution for harvesting heavy, dense forage while reducing horsepower requirements and ownership costs.

The GMD 9530 RV's integrated auger merging system delivers true two-in-one performance, allowing operators to mow conventionally with a wide swath or merge crop into a clean, centralized windrow. Unlike traditional belt-merger systems, the auger design achieves high-capacity mowing and merging with fewer components and lower horsepower demand.

Built to thrive in demanding forage conditions, the GMD 9530 RV features a 100% mechanical driveline, heavy-duty gearboxes and dedicated cam-clutch and shear-bolt protection. Large 20-inch augers operating at 900 RPM provide reliable crop flow and excellent throughput in heavy silage and winter forage crops, helping operators maintain productivity during critical harvest windows.

The machine also incorporates KUHN's proven Optidisc® Elite cutterbar technology. Differential disc spacing promotes a clean, consistent cut while the lubricated-for-life cutterbar eliminates regular oil changes. Protectadrive® disc-bearing protection helps prevent costly damage and downtime, reducing maintenance requirements and maximizing uptime throughout the season.

"The GMD 9530 RV was developed for producers looking for a durable, lower-cost alternative to mower-conditioner belt merger systems," said Travis Wolf, Hay & Forage Product Manager. "By combining mowing and merging into one machine, operators can improve harvesting efficiency while simplifying their operation and reducing overall ownership costs."

With a focus on productivity, simplicity and durability, the KUHN GMD 9530 RV delivers dependable performance for high-acreage forage operations. This new mower is now available through authorized KUHN dealers across North America. To locate a dealer or learn more about the GMD 9530 RV, visit www.kuhn.com.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
