KUHN HR 6042 R Power Harrow

Kuhn North America, Inc. is excited to introduce the new HR 6042 R power harrow, a 19'6" (6.0 m) machine designed to help growers achieve consistent seedbed preparation while improving efficiency and ease of operation.

Replacing the HR 6040 R, the HR 6042 R maintains KUHN's proven driveline, rotor system and durability while introducing a redesigned frame that improves accessibility and reduces soil buildup. The single-arm, single-pivot design provides easier access to key components such as gearboxes, simplifying maintenance and reducing service time, while helping keep the machine cleaner in demanding field conditions. Its folding design also improves lifting, balance and transport stability, keeping the center of gravity closer to the tractor for safer, more comfortable operation.

Designed for high-horsepower operations, the HR 6042 R features a heavy-duty, oil-cooled central gearbox capable of handling up to 460 PTO horsepower. Its advanced rotor and blade design produces uniform soil tilth at working depths up to 10", enabling operators to create a high-quality seedbed while reducing fuel consumption and limiting the number of passes required.

Operator convenience is further enhanced with standard in-cab hydraulic control of working depth and leveling bar adjustments, allowing quick responses to changing soil conditions without leaving the seat. Multiple rotor speeds and rear roller options provide flexibility to fine-tune soil finishing across a wide range of crops and soil types.

The HR 6042 R is ideal for specialty crop producers, including fruit, vegetable and potato operations, as well as row crop farms performing secondary tillage. It also serves commercial contractors and turf managers requiring precise soil conditioning and finishing capabilities.

"The HR 6042 R is built to deliver consistent seedbed results while making operators' jobs easier," said Nicholas Holmes, KUHN Product Manager. "From improved access for maintenance to in-cab adjustments and efficient soil conditioning, it's designed to maximize productivity in demanding conditions."

The HR 6042 R is available through authorized KUHN dealers across North America. To locate a dealer or learn more, visit www.kuhn.com.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
