New IntelliMix® Advanced Mixer Control System

The new IntelliMix® Advanced Mixer Control System represents the next evolution in mixer automation. As farms strive for consistent ration quality and efficient use of labor and equipment, the IntelliMix System provides a smarter approach to mixer operation. Available on KUHN VTC 200 and VXL 200 Series commercial mixers, the system integrates advanced controls with continuously variable transmission (CVT) technology to provide more consistent mixing performance, smoother full-load startups, reduced operator dependency, potential fuel savings and optimized power management maximizing mixing action.

These capabilities address some of the most pressing challenges facing today's dairy and livestock operations, including rising fuel and labor costs and difficulty finding and retaining skilled workers. At the same time, producers are under increasing pressure to deliver consistent feed quality and repeatable ration performance while managing larger herd sizes and higher-capacity feed batches. The IntelliMix System meets these demands through automated auger speed control and intelligent power management, helping ensure repeatable mixing results regardless of operator experience. By automating key functions and maintaining consistent auger speeds, the system improves mixing consistency, simplifies operator training and reduces impact of individual operating habits. The IntelliMix System also has the potential to reduce fuel consumption through the ability to reduce engine RPM while maintaining auger speeds. Designed for large-batch feeding applications, the IntelliMix System helps operations achieve faster mixing cycles, greater efficiency and more consistent results day after day.

The KUHN Knight IntelliMix Advanced Mixer Control System is now available on all new KUHN Knight VTC 200 and VXL 200 Series commercial mixers through authorized KUHN dealers across North America. To locate a dealer or learn more, visit our website: www.kuhn.com.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
