KUHN Merge Maxx 1102 & 1302 Commercial Hay Mergers

KUHN North America, Inc., is pleased to introduce the next generation of Merge Maxx® triple hay mergers with the MM 1102 and MM 1302, designed to maximize productivity, efficiency and forage quality for large dairies and commercial hay operations.

Built for tough, high-volume conditions, the MM 1102 and 1302 feature ISOBUS controls, a heavy-duty 42-inch belt and a redesigned solid floating windguard. These updates work together to deliver smooth crop transfer, consistent windrows and improved operator comfort, setting a new standard for performance and reliability.

The floating windguard minimizes crop loss and forms uniform windrows that feed more efficiently into the chopper, supporting faster and more consistent harvesting. High-capacity hydraulics, the wide belt and steady crop flow design allow the machines to perform confidently in dense, heavy forage without hesitation.

Operator efficiency is enhanced through the IntelliMerge® ISOBUS control system, which centralizes key machine functions in the cab for intuitive operation and real-time diagnostics. Commercial-grade pickups with split bearings and anti-wrap discs reduce wear and downtime, while a spring belt tensioning system paired with OptiSense™ belt stall detection helps prevent plugs before they occur.

“The Merge Maxx MM 1102 and 1302 are designed for operators who demand maximum throughput without compromising crop quality,” said Travis Wolf, Hay & Forage Product Manager. “These machines deliver smooth, efficient merging even in dense, high-yielding forages, helping operators make the most of every cutting window.”

With a focus on uptime, ease of use and crop protection, the KUHN Merge Maxx MM 1102 and MM 1302 deliver dependable performance for demanding commercial hay operations. These mergers are now available through authorized KUHN dealers across North America. To locate a dealer or learn more about the MM 1102 and 1302 Series, visit www.kuhn.com.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
